# 1. Testimonials Configuration

Once you are finished with installing the extension it is time to proceed to your Magento 2 backend to finalize the Testimonials setup.

Before start using the extension we suggest running through the Testimonials extension settings and other options available to adjust the settings. This will help in better understanding of how the extension functions and what can you expect your testimonial to look and feel like.

# 1.1. Accessing the Extension Main Settings

The screenshot shows the Ulmod admin interface. On the left is a dark navigation sidebar with icons and labels for various sections: DASHBOARD, SALES, PRODUCTS, CUSTOMERS, MARKETING, CONTENT, REPORTS, STORES, SYSTEM, and FIND PARTNERS & EXTENSIONS. The 'STORES' section is expanded, showing sub-items: Settings, All Stores, Configuration, Terms and Conditions, Order Status, Taxes, Tax Rules, Tax Zones and Rates, Currency, Currency Rates, and Currency Symbols. The 'Configuration' item is highlighted. The main content area shows a 'Stores' page with a search bar, a notification bell, and a user profile 'admin'. A 'Reload Data' button is visible. Below this, there's a message: 'disabled. To enable the chart, click [here](#).' A table displays product information with columns for Tax (\$0.00), Shipping (\$0.00), and Quantity (0). A callout box with a white border and black background contains the text: 'To access the configuration settings for this extension, please go to **Stores > Configuration > Ulmod Extensions > Testimonials**'.
