1. Product Inquiry Configuration

Once you are finished with installing the extension it is time to proceed to your Magento 2 backend to finalize the Product Inquiry setup.

Before start using the extension we suggest running through the Product Inquiry extension settings and other options available to adjust the settings. This will help in better understanding of how the extension functions and what can you expect your product inquiry to look and feel like.

1.1. Accessing the Extension Main Settings

The screenshot shows the Ulmod admin interface. On the left is a dark navigation sidebar with icons and labels for various sections: Dashboard, Sales, Products, Customers, Marketing, Content, Reports, Stores, System, and Find Partners & Extensions. The 'Stores' section is expanded, showing sub-items like Settings, All Stores, Configuration, Terms and Conditions, Order Status, Taxes, Tax Rules, Tax Zones and Rates, Currency, Currency Rates, and Currency Symbols. The 'Configuration' item is highlighted. The main content area shows a 'Product Inquiry' table with columns for Tax, Shipping, and Quantity. A 'Reload Data' button is visible in the top right. A callout box with a white border and black background contains the following text:

To access the configuration settings for this extension, go to **Stores > Configuration > Ulmod Extensions > Product Inquiry**

	Tax	Shipping	Quantity
Track Tote	\$0.00	\$0.00	4
Messenger Bag			4
Shoulder Tote			2
Fitness IV			1
Weather Tank-L-Gray			1

1.2. General
