1. Categories Duplication

Once you are finished with installing the extension it is time to proceed to your Magento 2 backend to duplicate categories.

1.1. Accessing the Extension Guide

The screenshot shows the Ulmod admin interface. On the left is a dark sidebar menu with the following items: Stores (selected), Settings, All Stores, Configuration, Terms and Conditions, Order Status, Taxes, Tax Rules, Tax Zones and Rates, Currency, Currency Rates, and Currency Symbols. The main content area shows a 'Stores' page with a 'Reload Data' button and a table with columns for Tax (\$0.00), Shipping (\$0.00), and Quantity (0). A callout box is overlaid on the screen, containing the following text:

To view the duplicate categories guide, go to **Stores > Configuration > Ulmod Extensions > Duplicate Categories Guide**

Guide

To duplicate a category, please go to Ulmod -> Categories. Then select a category you want to duplicate. You will find 'Duplicate Category' button when editing a category. click on this button

Duplicate Options

At the duplication page you can choose parent category for the duplicate. Also you can choose whether the duplicate category should inherit subcategories and product relations from the original category.

Search and Replace

You can make replacements in the following fields of the duplicate category: name, description, meta keywords, meta description.

Words from 'Search For' fields will be replaced with content from 'Replace With' field.

If you don't need to make any replacements, please leave these fields empty.

After duplication, the result will appear on category tree. Duplicated categories will be renamed manually.

1.3. Duplicate Category Button
