1. Social Share Configuration

Once you are finished with installing the extension it is time to proceed to your Magento 2 backend to finalize the Social Share setup.

Before start using the extension we suggest running through the Social Share extension settings and other options available to adjust the settings. This will help in better understanding of how the extension functions and what can you expect your social share to look and feel like.

1.1. Accessing the Extension Main Settings

The screenshot shows the Ulmod admin interface. On the left is a dark sidebar menu with the 'Stores' section expanded. The 'Stores' menu includes: Settings, All Stores, Configuration, Terms and Conditions, Order Status, Taxes, Tax Rules, Tax Zones and Rates, Currency, Currency Rates, and Currency Symbols. The 'Settings' sub-menu is further expanded to show: Attributes, Product, Attribute Set, Rating, and a 'Reload Data' button. The main content area displays a configuration table with columns for Tax, Shipping, and Quantity. A callout box with a white border and black background contains the following text:

To access the configuration settings for this extension, please go to **Stores > Configuration > Ulmod Extensions > Social Share.**

	Tax	Shipping	Quantity
	\$0.00	\$0.00	0
			Quantity
			4
			4
Shoulder Tote		\$24.00	2
Fitness IV		\$14.00	1
Weather Tank-L-Gray		\$22.00	1
