Mega Menu for Magento 2
User Guide

Table of Contents

1. Mega Menu Configuration

Once you are finished with installing the extension it is time to proceed to your Magento 2 backend to finalize the Mega Menu setup.

Before creating your first mega menu item we suggest running through the Mega Menu settings and other options available to adjust the Mega menu. This will help in better understanding of how the extension functions and what can you expect your stores to look and feel like.

1.1. Accessing the Extension Main Settings

To access the configuration settings for this extension, please go to **Stores > Configuration > Ulmod Extensions > Mega Menu**

1.2. Configuration Settings

Store View: Default Config ▾   ❓

ULMOD EXTENSIONS ︿

Mega Menu

General

Enable
[store view]

Yes ▾

If Yes, the Mega Menu extension will be enabled in storefront.

Menu Effect (for desktop)
[store view]

Fade ▾

Choose the menu effect. This is how the content of the menu will be shown on desktop devices.

Top Menu

Enable Sticky Menu
[store view]

Yes ▾

If Yes, the top menu become sticky on scroll.

Responsive Menu

Menu Effect (for mobile)
[store view]

Blind ▾

Choose the mobile menu effect. This is how the content of the menu will be shown on mobile devices

---

In the General section :
Set the **Enable** option to **'Yes'** to enable the extension in frontend or to **'No'** to disable the extension.
Choose the Menu Effect for desktop view :
• **'Fade'** - menu item will be displayed immediately when you hover on menu title
• **'Slide'** - this effect is similar to Fade but menu item will be displayed more slowly
• **'Toggle'** - menu item will only be displayed when you click on menu title

In the Top Menu section:
If **Enable Sticky Menu** field is set to **'Yes'** the top menu becomes sticky on scrolling the page.

In the Responsive Menu:
Choose the Mobile Menu Effect for mobile devices : **Blind or Slide.** This effect will show for all devices with max screen width equal to 768px.

2. Mega Menu Management

Mega Menu

Rich features of the extension allow you to create professional Magento 2 navigation menu with the support of multiple submenu types such as Anchor Text, Default Category Listing, Static Category Listing, Dynamic Category Listing, Product Listing, Product Grid, Dynamic products listing by category, Static products listing by category, Content and Navigation menu's elements(such as Header Content, Main Content, Featured Content or Footer Content) regardless of your chosen menu layout.

To view, edit and create mega menu item, please go to **Marketing → Mega Menu by Ulmod → Mega Menu**. A convenient grid displays all your mega menu items. Discover mass actions to manage mega menu items content faster and export them in CSV, XML and Excel file. To create new mega menu item, please click the **'Add New Megamenu'** button in the upper right corner of the page.

To create a new megamenu item, hit the **Add New Megamenu** button.

is simply dummy text of the printing and typesetting industry. Lorem Ipsum has been the industry's standard dummy text ever since the 1500s, when an unknown printer took a galley of type and scrambled it to make a type specimen book

3. Front-End View

Horizontal & Vertical Menu

The horizontal and vertical menu help your customers save time, view shop easily and purchase quickly. You can show navigation menu as horizontal, vertical or both on same page..

Submenu Types

The submenu allows customers to view your megamenu content as products, categories or custom content.

Navigation menu's Elements

All elements of navigation menu (Header, Main, Featured or Footer Content) allows customers to view the header, footer, main and featured content on eye caching.

Product Labels

The product labels feature on Mega Menu is a perfect solution to highlight promoted items using color style and make them more visible and attractive for your customers.

Mobile Devices

Mobile-friendly design helps your customers navigate through your store with maximum comfort on tablets and smartphones.
