1. Store Locator Configuration

Once you are finished with installing the extension it is time to proceed to your Magento 2 backend to finalize the Store Locator setup.

Before creating your first store we suggest running through the Store Locator extension settings and other options available to adjust the Store. This will help in better understanding of how the extension functions and what can you expect your stores to look and feel like.

1.1. Accessing the Extension Main Settings

The screenshot shows the Ulmod extension settings page. The left sidebar contains a menu with the following items: Dashboard, Sales, Products, Customers, Marketing, Content, Reports, Stores (highlighted), System, and Find Partners & Extensions. The main content area is titled 'Stores' and includes a search bar, a notification bell, and a user profile 'admin'. A 'Reload Data' button is visible in the top right. The main content area is divided into three sections: 'Attributes' (with sub-items: Product, Attribute Set, Rating), 'Tax' (with sub-items: Tax Rules, Tax Zones and Rates), and 'Shipping' (with sub-items: Tax, Shipping, Quantity). A callout box with a white border and a black background contains the text: 'To access the configuration settings for this extension, please go to **Stores > Configuration > Ulmod Extensions > Store Locator**'. Below the callout box, a table is visible with columns for 'Tax', 'Shipping', and 'Quantity'. The table contains the following data:

Tax	Shipping	Quantity
Track Tote	\$32.00	4
Messenger Bag	\$45.00	4
Boulder Tote	\$24.00	2
Fitness IV	\$14.00	1
Weather Tank-L-Gray	\$22.00	1

1.1. Accessing the Extension Main Settings

Configuration

From here, you can manage all the main extension settings. Just select the tab you want to configure, and tweak its features as you need.

Used with Google Suggest to search nearest store from customer location. Max radius is 2000.

Distance Unit
[store view]

Kilometers

Unit to measure distance between store and customer.

Search Criteria – Choose the criteria to search store in frontend. Customers can search for stores by area using Store Name, Country, State/Province, City and Zip Code criteria.

Default Radius for Search – Specify the radius used with Google Suggest to search nearest store from customer location. Max radius is 2000.

Choose the Distance Unit :

- **'Kilometers'** to measure distance between store and customer in kilometer.
- **'Miles'** to measure distance between store and customer in miles

2. Store Locator Management

Stores

Reach features of the extension allow you to create stores adding store name, description, link, sort order, contact info, meta data, map location, images, tags, schedule, holidays, special days and much more. To view, edit and create store, please go to **Marketing → Store Locator by Ulmod → Stores**. A convenient grid displays all your stores. Discover mass actions to manage stores content faster and export them in CSV or XML file. To create new store, please click the **'Add New Store'** button in the upper right corner of the page.

Tags

Tags are more specific. They help visitors find stores in the location they are interested in quicker. To view all the tags that are used in your store location, please go to **Marketing → Store Locator by Ulmod → Tags**. There you can view all the tags you have with their main parameters on a convenient grid. Click on the tag to edit it and use the **'Add New Tag'** button to create a new tag.

Schedules

Schedules help you provide the working time of your stores (from Monday to Sunday) to visitors. To view all the schedules that are used in your store, please go to **Marketing → Store Locator by Ulmod → Schedules**. There you can view all the schedules you have with their main parameters on a convenient grid. Click on the schedule to edit it and use the **'Add New Schedule'** button to create a new schedule.

Holidays

Holidays help you provide the holiday time of your stores to visitors. To view all the holidays that are used in your store, please go to **Marketing → Store Locator by Ulmod → Holidays**, there you can view all the holidays you have with their main parameters on a convenient grid. Click on the holiday to edit it and use the **'Add New Holiday'** button to create a new holiday.

Special Days

Special days help you provide the special days of your stores to visitors. To view all the special days that are used in your store, please go to **Marketing → Store Locator by Ulmod → Special Days**, there you can view all the special day you have with their main parameters on a convenient grid. Click on the special day to edit it and use the **'Add New Special Day'** button to create a new special day.

2.1. Managing Stores

To create a new store, hit the **Add New Store** button.

Manage Store

Add New Store

Search by keyword
